

# Reuben Wilson

## NEA Survey Response

### The student

<b>Name</b>	Reuben Wilson
<b>School Email</b>	wilsr124.209@student.foresthillschool.co.uk
<b>Programming Level</b>	5 / 10

### Student's project

<b>Description</b>	A behaviour management application
<b>List of languages</b>	python
<b>List of technologies</b>	pyQT
<b>Experience using languages/technologies</b>	Python - I have used it since year 9 pyQT - i have not learned how to use it yet
<b>Client</b>	
<b>Client's identity</b>	parent with many kids (e.g. ~ NBA youngboy)
<b>Client fictional?</b>	Yes

### Student's Progress

<b>Current section</b>	I haven't started
<b>List of completed sections</b>	Analysis
<b>Current page count</b>	0
<b>Progress by section</b>	
<b>Analysis</b>	Not started (0%)
<b>Design</b>	Not started (0%)

<b>Technical Implementation</b>	Not started (0%)
<b>Testing</b>	Not started (0%)
<b>Evaluation</b>	Not started (0%)

## Other

<b>Implementation concerns</b>	not sure how to create the application yet
<b>Anything else? (Misc)</b>	

## Louis' Comments

<b>General Comments</b>	<p>Generally, I'm trying to pick out some positives for each NEA, so I suppose at least Reuben is honest.</p> <p>Beyond that, there isn't much I can say, as he's clear that he is yet to start. One of the most concerning projects (if not the most concerning project).</p>
<b>Next steps</b>	If they haven't already, somebody should probably have a word. Would be good to know why he hasn't started. If he just can't be bothered, I can't really help him. However, I might be able to help if he just doesn't know where to start.
<b>Complexity</b>	If completed, this project could reach the top complexity band, but would likely be in the middle band.

*See the next page for detailed complexity band information.*
